

Sector: **CONSTRUCTION**

Service: **TOTAL SECURITY SOLUTION**

Client: **BROOKFIELD MULTIPLEX**

*“AOS have a strong dedicated team that always want to improve their service.”*

**Alan Keeley, Director, Brookfield Multiplex**

## About Brookfield Multiplex

Brookfield Multiplex is a leading global Contractor who build, engineer, maintain and operate property and infrastructure assets. They create large-scale and complex landmark buildings, commercial structures and infrastructure projects.

Their heritage is in construction, forged in Australia, with ensuing growth in the Middle East, Asia, Europe and Canada. They are expanding this legacy, applying their expertise and strength to the Engineering and Infrastructure sectors.

Brookfield Multiplex have won over 508 awards and completed over 750 projects in 8 countries and employ over 3,300 staff.

## The Security Challenges

Brookfield Multiplex was awarded the contract in Peterborough along with Peterborough Progress Health, to design, construct and operate three new health care facilities in Peterborough; a contract worth £380 million. It was one of the largest PFI projects ever undertaken.

A high level of security was paramount during the construction period, which required specific emphasis on access control, daytime security and out of hours security.

AOS acted as a security advisor, as well as partner, in ensuring that the security provision was always appropriate to the needs of the Client and sufficiently flexible to cope with changing risks and situations that a construction site presents.

## Our Solution

AOS provided overlapping site-specific services, including traffic marshals, first aiders and access control for both pedestrian and vehicular entry points. The busy nature of the site meant that security needed to be flexible and responsive and during the time of the project there were few security issues. We provided the client with weekly reports and regular site meetings to discuss any concerns and actively kept in contact with the local police to gain information on crime that could affect the site.

AOS introduced Watchman Monitoring Services, a live time patrol system reporting direct to the 24/7 control centre. The project was a huge success and Brookfield Multiplex achieved a silver award as part of the Considerate Contractors Scheme, and AOS played a big part in achieving this award.
